The image shows the product packaging for 'The 'Ove'Glove'. The box is white with black and red text. It features the product name 'The 'Ove'Glove' in a large, stylized font, followed by 'Non-Slip Hot Surface Handler' and 'SILICONE GRIP'. Below the box, a pair of white gloves with black silicone grips on the palms and fingers is shown. The gloves also have 'The 'Ove'Glove' printed on the back of the hand.

Piping hot pans and sizzling skillets can create danger in the kitchen, but now you can protect yourself from painful burns while creating a culinary master piece, with The Ove Glove®.

The 'Ove' Glove is made from an outer layer of DuPont NOMEX and KEVLAR - the same materials used in firefighter's gloves. Combined, these two materials make the 'Ove' Glove fire and heat resistant, withstanding extreme temperatures up to 540 degrees F. The thermal properties of the 'Ove' Glove outer layer dramatically extend the time a person can handle a hot object.

The tough exterior of the glove forms a thermal isolation barrier, slowing the temperature increase in the interior layer of double-knit cotton. Even when exposed to an open flame, the outer layer of the glove will not catch fire or melt, so it is perfect for use when you want to flambé!

### *The Ove Glove Features:*

**A five fingered flexible grip** that can be used on your left or right hand, and makes everything from sautéing to scrambling easy.

**Non-Slip Silicone Grip** helps you handle those slippery dishes.

The inner layer is made of soft double-knit cotton and is machine washable.

The 'Ove' Glove also protects fingers from getting grilled during the BBQ season.

The 'Ove' Glove, get one for the chef in your family!

# The 'Ove'Glove®

**HOT SURFACE HANDLER**

The 'Ove'Glove® is great for the kitchen, the barbeque and handling other hot surfaces around the house or projects around the home. The 'Ove'Glove® dramatically extends the time you can handle a hot object in your hands.

The tough exterior layer of the glove (made of Nomex® and Kevlar®) is designed as a thermal insulator to slow the temperature increase in the soft, doubleknit cotton interior of the glove. If exposed to an open flame, the outer layer of the glove is flame resistant and does not melt.

**WARNING:** This product extends the time to handle hot objects. It is NOT a permanent protection against fire or heat. Do not use this glove with steam or while glove is wet. Can result in injury if not used according to instructions.
